How These Activities Support the Next Generation Science Standards*

Scie	nce and Engineering Practices
1	Asking questions (for science) and defining problems (for engineering)
2	Developing and using models
3	Planning and carrying out investigations
4	Analyzing and interpreting data
5	Using mathematics and computational thinking
6	Constructing explanations (for science) and designing solutions (for engineering)
7	Engaging in argument from evidence
8	Obtaining, evaluating, and communicating information

Crosscutting Concepts							
1	Patterns						
2	Cause and effect						
3	Scale, proportion, and quantity						
4	Systems and system models						
5	Energy and matter						
6	Structure and function						
7	Stability and change
