

Biochemistry: A Guided Inquiry

Table of Contents

Activity

- 1–Thermodynamics of Water
- 2–Buffers and pH in Biological Systems
- 3–Amino Acids and Protein Primary Structure
- 4–Protein Secondary Structure
- 5–Protein Tertiary and Quaternary Structure
- 6–Oxygen Binding Proteins
- 7–Structural Changes in Hemoglobin
- 8–Enzyme Catalysis
- 9–Enzyme Kinetics
- 10–Enzyme Inhibition
- 11–Lipid Structure and Function
- 12–Membrane Transport Article
- 13–Carbohydrate Structure
- 14–Introduction to Metabolism
- 15–Glycolysis and Gluconeogenesis
- 16–Regulation of Glycolysis and Gluconeogenesis
- 17–Glycogen Metabolism
- 18–Citric Acid Cycle
- 19–Electron Transport Chain
- 20–ATP Synthase
- 21–Fatty Acid Catabolism

Activity

22–Hormonal Regulation of Metabolism

23–Fatty Acid Synthesis

24–Lipid Synthesis and Regulation

25–Urea Cycle and Amino Acid Catabolism

26–Amino Acid Biosynthesis

27–Purine Metabolism Article

28–Introduction to DNA Replication

29–DNA Replication Article

30–Transcription

31–Regulation of Transcription

32–RNA Processing

33–Translation

34–HIV RT Inhibitor Synergy Article
